

MYKHAILO ANANIEV

Software Engineer

@ mykhailoananiev23@gmail.com <https://mykhailo.vercel.app/>

📍 Sukhoiarska Street, Building 105, Merefa, Ukraine

SUMMARY

Versatile, results-driven and meticulous Senior Software/Full-stack Developer with over 6 years of experience using Agile and Scrum methodologies, blockchain, NFT and web3 as well as emerging technologies to develop custom software solutions for companies worldwide. Adept at designing, implementing, testing, debugging and maintaining software applications across various industries while using C#, Python, Unity, React, Angular, VueJS, NodeJS and Ruby on Rails.

Here's a glimpse of my expertise:

Real-time Data Streaming: Extensive background in implementing powerful real-time data streaming capabilities using technologies like Lightstreamer and Apache Kafka.

Trading Integration: Proven track record in seamlessly integrating trading functionalities, providing users with advanced charting, real-time market data, and a seamless trading experience.

AI Integration: Expertise in incorporating artificial intelligence into applications, enhancing functionality through machine learning models and intelligent algorithms. This enables the delivery of advanced features, predictive analytics, and personalized user experiences.

Chatbot Integration: Proficient in leveraging conversational interfaces to seamlessly integrate chatbots into applications, fostering efficient interaction, enhancing user engagement, and delivering personalized assistance.

My Expertise Area:

- 1.Trading Integration(Stock, Market and Web3)
- 2.Real-time Data Streaming
- 3.WebRTC Integration
- 4.Chrome Extension Development
- 5.AI Integration
- 6.Open AI Embeddings
- 7.API Integration (Third-Party and RESTful)
- 8.DevOps with Azure
- 9.Cloud Service (Vercel, AWS, Firebase)

Currently seeking a remote contract position as a Software Developer.

EDUCATION

Bachelor of Science in Computer Science

State Academy of Agriculture and Ecology of Ukraine

📅 2014 - 2019

SKILLS

C#	Asp.net	Dotnet	Unity
Python	Django	Javascript	
Typescript	Trading	Web3	
WebRTC	Aws	Azure	solidity

EXPERIENCE

Software Engineer

[Saasconversion.io & CX.AI](#)

📅 09/2021 - 2023 📍 Location

Web & Mobile & Desktop App Development

- Created custom websites and web apps using Javascript frameworks as per client specification
 - Created custom mobile apps using React Native/Ionic Framework
 - Created custom desktop apps using .net, Unity, Electron.js
 - Designed and implemented scalable backend using Node.js, C#, Python and Laravel as per client specification
 - Designed database based in PostgreSQL and MongoDB
- Technical Stacks: C#, Asp.net, Python, Unity, React, Next.js, Vue.js, Nuxt.js, React Native, Laravel, TypeScript, PHP, PostgreSQL, MongoDB
